Software & Data Engineer | Systems Integration

Software and data professional combining full-stack development with manufacturing analytics and systems integration. Build data models, ETL workflows, dashboards, and applications using Python, SQL, Power BI, JavaScript/React, and AWS within GMP-regulated manufacturing.

WORK EXPERIENCE

Lonza

Bend, OR • 07/2019 - Present

Operator III / Data & Process Improvement • Full-time

- Develop operational data and analytics solutions supporting pharmaceutical manufacturing, translating production requirements into structured datasets, KPIs, and reporting workflows.
- Build ETL workflows using Power Query to extract, clean, transform, validate, and map operational data into structured reporting models.
- Operate and troubleshoot pharmaceutical manufacturing equipment and process systems within a GMP-regulated production environment, escalating equipment and process issues to Engineering and Maintenance when needed.
- Collaborate with Operations and Engineering stakeholders to troubleshoot process issues, define requirements, validate data, and improve manufacturing workflows and technical documentation.
- Design data models and system logic supporting equipment performance, downtime, workforce qualification, staffing readiness, and operational decision-making.

PROJECTS

NutriSnap AI-Powered Nutrition Analyzer

- Built a computer-vision application using GPT-4, REST APIs, React, and AWS Amplify to analyze food images and return structured nutrition data.
- Designed the responsive UI, API integration, and structured JSON data flow.

Chatbot-AI Conversational Web Assistant

- Built and deployed an OpenAI-powered web application with contextual memory, responsive UI, and persistent chat flow.
- Integrated the OpenAI API with Amazon Cognito authentication and deployed the application using AWS Amplify.

SKILLS

Languages & Development: Express.js, JavaScript, JSON, Node.js, Python, React, REST APIs, SQL

Data & Analytics: Data Modeling, Data Validation, DAX, ETL, Excel, Power BI, Power Query

Cloud & Industrial: AWS, Azure, Databricks, Data Lake, FactoryTalk HMI, GMP, PI Vision, SAP, SCADA

Tools : Git/GitHub, Power Automate, Smartsheet

EDUCATION

University of Oregon

Coding Bootcamp — Full-Stack Web Development | 2020–2021
